Blood Sampling Technique on Captive Elephant. Male Vs Female

Male

Female

Blood Sampling Technique on Captive Elephant : Adult Vs Juvenile

Adult

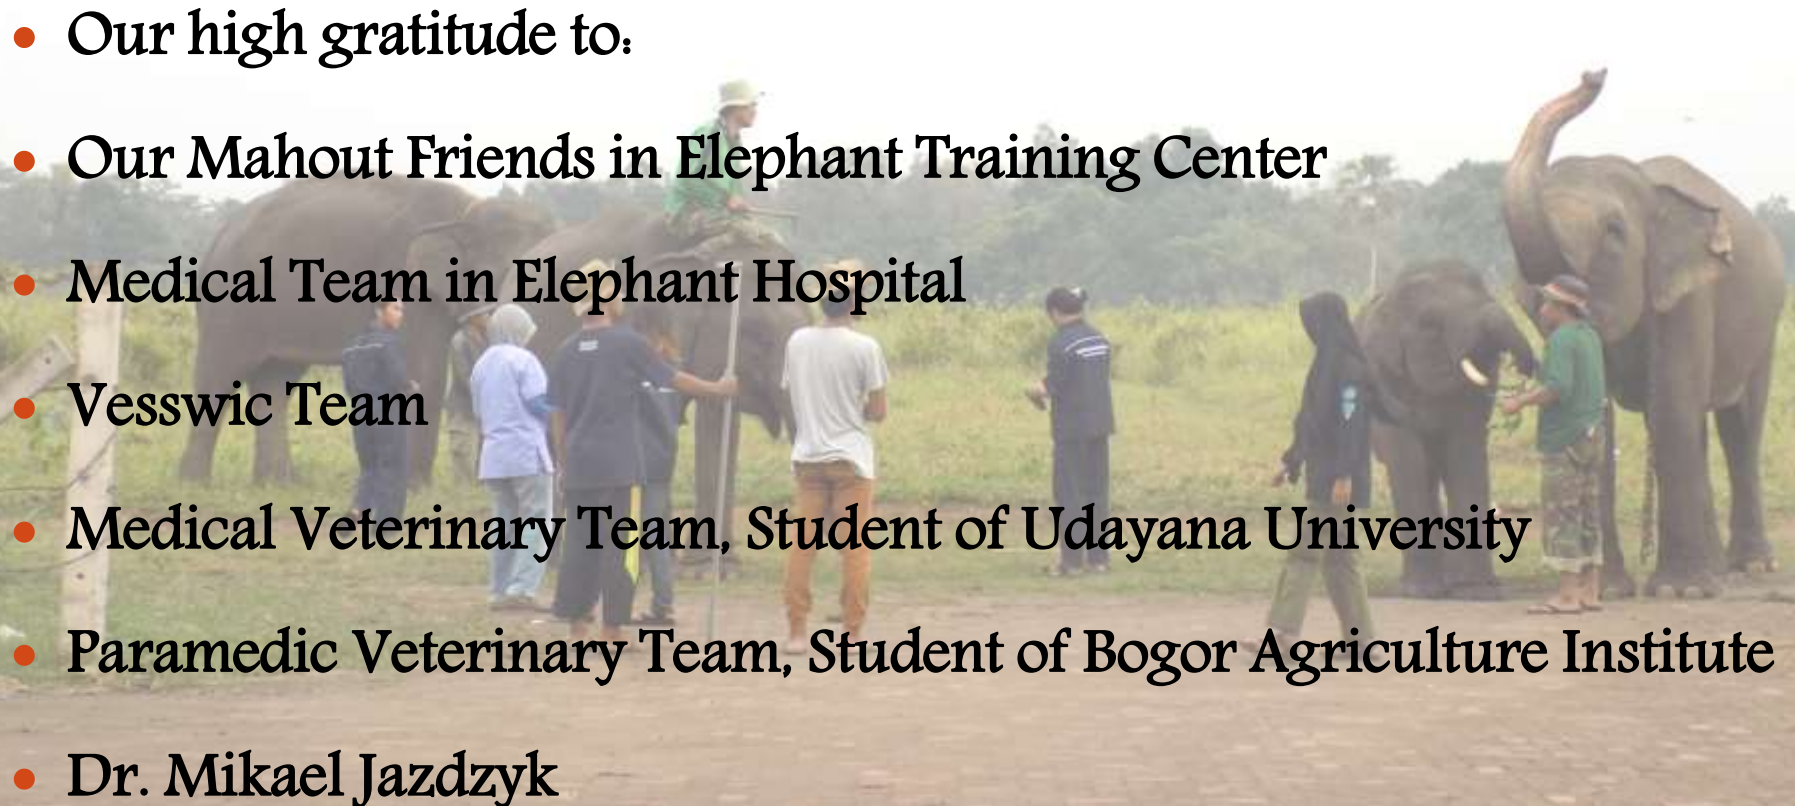

Juvenile

Conclusion

- There are three steps in elephant blood sampling procedures i. e. preparation, handling, and blood sampling.
- no different treatment during preparation, but the last two steps based on sexual and age behaviour. Male and juvenile individuals were treated specifically due to behavior background.

Acknowledgment

- Our high gratitude to:
 - Our Mahout Friends in Elephant Training Center
 - Medical Team in Elephant Hospital
 - Vesswic Team
 - Medical Veterinary Team, Student of Udayana University
 - Paramedic Veterinary Team, Student of Bogor Agriculture Institute
 - Dr. Mikael Jazdyk
