### **Antennas and Propagation**

Design and Analysis of Triple Band Inverted-H Antenna for DCS, WiMAX and WLAN Applications .....	1
<i>A.M. Shire, K.I. Jahun, S.A. Hamzah, R. Talib, and K.N. Ramli</i>	
A Wideband Log Periodic Antenna with Fractal Koch Geometry and Rectangular Stub .....	5
<i>N.A. Rahman and M.F. Jamlos</i>	
Parametric Study of Integrated Stacked Microstrip Antenna with Light Emitting Diode (LED) for Wi-Fi Application .....	9
<i>Hamizan Yon, Aziati H. Awang, M.T. Ali, S. Subahir, and S.N. Kamaruddin</i>	
Design of Multiple Input Multiple Output Patch Antenna for Multiband Applications .....	13
<i>Waheeb Salim Abdulrab, Md Rafiqul Islam, Mohamed Hadi Habaebi, and Musse Mohamud Ahmed</i>	

Millimeter-Wave Parasitic AMC Patches on the Array Antenna .....	19
<i>Maisarah Abu, Maizatun Muhamad, Zahriladha Zakaria, and Hasnizom Hasan</i>	
An Analysis of Dual-Band Octagonal Ring Metamaterial Absorber .....	25
<i>Maisarah Abu, Hasnizom Hassan, Mohd Shahril Izuan Mohd Zin, Siti Adlina Mat Ali, and Maizatun Muhammad</i>	
Design of a Quintuple Band Microstrip Patch Antenna Using Multiple L-Slots .....	30
<i>Mohamed A., Islam Md. Rafiqul, Sarah Yasmin, and K. Badron</i>	
Microstrip Dipole UHF-RFID Tag Antenna for Metal Object Tagging .....	36
<i>N.M. Faudzi, A.N.A. Rashid, A. Ibrahim, M.F. Khyasudeen, and M.T. Ali</i>	
Performance Assessment of Frequency Selective Surface Structures for Frequency Independent Antennas Applications .....	42
<i>A.M. Shire</i>	
Massive MIMO for Fifth Generation (5G): Opportunities and Challenges .....	47
<i>Noor Hidayah Muhamad Adnan, Islam Md. Rafiqul, and A.H.M. Zahirul Alam</i>	
Miniaturized Log Periodic Fractal Koch Antenna with C-Shaped Stub .....	53
<i>N.A. Rahman and M.F. Jamlos</i>	
Planar Antenna with U-Shaped Slot on Radiating Patch and Conductor-Backed Plane for UWB Applications .....	57
<i>S.Z. Aziz and M.F. Jamlos</i>	
Frequency Diversity Improvement Factor for Rain Fade at Terrestrial Link in Tropical Region .....	62
<i>U. Kesavan, Islam Md. Rafiqul, Khaizuran A., and A.R. Tharek</i>	
 <b>Computer Networks and Security</b>	
Exploiting Privacy-Policy and -Management Features on Social Networks: A User's Perspective .....	66
<i>Mohd Ishak Ismail, Md Arafatur Rahman, and Saiful Azad</i>	
An Improved Indoor Positioning Algorithm Based on RSSI-Trilateration Technique for Internet of Things (IOT) .....	72
<i>Mohd Ezanee Rusli, Mohammad Ali, Norziana Jamil, and Marina Md Din</i>	
HQ: An Architecture for Web Cache Replacement Algorithms in Distributed Systems .....	78
<i>Xueqiang Zou and Chen Chen</i>	
Cryptanalysis and Improvement of Remote User Authentication Scheme Using Smart Card .....	84
<i>R. Madhusudhan and Manjunath Hegde</i>	
Identification and Evaluation of Discriminative Lexical Features of Malware URL for Real-Time Classification .....	90
<i>Morufu Olalere, Mohd Taufik Abdullah, Ramlan Mahmud, and Azizol Abdullah</i>	

## Information Theory and Signal and Image Processing

Unicode Encryption and Its Role in Facilitating Writing Quran Using the Computer .....	96
<i>Mussa A. Abudena, Shihab A. Hameed, Aisha H. Hashim, and Othman O. Khalifa</i>	
The Haar Analysis of Nonlinearity Cryptographic Security Criterion .....	101
<i>H.M. Rafiq and M.U. Siddiqi</i>	
Analysis of Autocorrelation Function of Boolean Functions in Haar Domain .....	106
<i>H.M. Rafiq and M.U. Siddiqi</i>	
Approaches in Discovering the Sensitivities of Decomposed Components of an Input to the Output of a Linear Dynamic System .....	111
<i>Chengliang Huang</i>	
Automated Bank Note Identification System for Visually Impaired Subjects in Malaysia .....	115
<i>Rashidah Funke Olanrewaju, Fajingbesi Fawwaz Eniola, and Shaibo Mohammed Mahmoud M.</i>	
On the Characteristics of Various Quranic Recitation for Lossless Audio Coding Application .....	121
<i>Teddy Surya Gunawan and Mira Kartiwi</i>	

## Instrumentation and Control

Halal Kit Identifier Using Radio Frequency Identification Technology .....	126
<i>Noor Hafizah Azlin Abd Halim, Hasmah Mansor, and Nurul Fadzlina Hasbullah</i>	
Chicken Farm Monitoring System .....	132
<i>Nur Syamimi Amir, Abdul Muiz Fathi Md. Abas, Nur Anis Azmi, Zulkifli Zainal Abidin, and Amir Akramin Shafie</i>	
IIUM Bus on Campus Monitoring System .....	138
<i>Muhammad Nur Zaki Juhari and Hasmah Mansor</i>	
Estimation of Upper Limb Impedance Parameters Using Recursive Least Square Estimator .....	144
<i>Zaw Lay Htoon, Shahrul Na'im Sidek, Sado Fatai, and Muhammad Mahbubur Rashid</i>	
Investigation on Tracking Performance of Adaptive Friction Compensation Using Cascade P/PI Controller at Low Velocity .....	149
<i>Nur Aidawaty Rafan, Zamberi Jamaludin, and Chiew Tsung Heng</i>	
Design of a Switching Mode Three Phase Inverter .....	155
<i>Tawfikur Rahman, S.M.A. Motakabber, and M.I. Ibrahimy</i>	

Portable Thumb Training System for EMG Signal Measurement and Analysis .....	161
<i>Muhammad Rozaidi Roslan, Shahrul Naim Sidek, Siti Fauziah Toha, Sabrilhakim bin Sidek, and Mohd Syukry bin Mohd Khalid</i>	
Phase Synchronous Inverter for Microgrid System .....	167
<i>Tawfikur Rahman, S.M.A. Motakabber, and M.I. Ibrahimy</i>	
Low Noise Inverter for Poly Phase Microgrid System .....	172
<i>Tawfikur Rahman, S.M.A. Motakabber, and M.I. Ibrahimy</i>	
Design and Development of an Autonomous Surface Vessel for Inland Water Depth Monitoring .....	177
<i>Mohamad Hilmi Bin Mat Idris, Muhammad Al Azhari Bin Che Kamarudin, Muhammad Irsyad Sahalan, Zulkifli Bin Zainal Abidin, and Muhammad Mahbubur Rashid</i>	
Simulation Analysis of Micro Coils for the Fabrication of Micro-scaled Search Coil Magnetometer .....	183
<i>Tengku Muhammad Afif Bin Tengku Azmi and Nadzril Bin Sulaiman</i>	
Classification of miRNA Expression Data Using Random Forests for Cancer Diagnosis .....	187
<i>Eliza Razak, Faridah Yusof, and Raha Ahmad Raus</i>	
Arduino-Based Biosensor Impedance Measurement .....	191
<i>Nurul Najwa Khamis, Nor F. Za'bah, Ahmad Fairuzabadi Mansor, and Anis Nurashikin Nordin</i>	
Automated Water Tank Filtration System Using LDR Sensor .....	195
<i>S. Noorjannah Ibrahim, M.S. Lokman Hakim, A.L. Asnawi, and N.A. Malik</i>	
Modulation Optimization Effect on Total Harmonic Distortion of Single Phase H-Bridge Inverter Based Selective Harmonics Elimination Technique .....	200
<i>Ezzidin Hassan Elmabrouk Aboadla, Sheroz Khan, Mohamed Hadi Habaebi, Teddy Gunawan, Belal Ahmed Hamidah, and Majdee Tohtayong</i>	
Design and Analysis of a Buck-Boost Converter Circuit for Piezoelectric Energy Harvesting System .....	204
<i>Mohammad G. Mostafa, S.M.A. Motakabber, and Muhammad I. Ibrahimy</i>	
Fuzzy Logic Based Self-Tuning PID Controller for an Autonomous Hybrid Wind/Battery Chargeable Power System .....	208
<i>Shiref A. Abdalla, Hasmah Mansor, Nurul F. Hasbullah, and Ahmad M.M. Qasem</i>	
Wireless Smart Health Monitoring System via Mobile Phone .....	213
<i>Nur Hidayah Binti Abu Bakar, Khaizuran Abdullah, and Md Rafiqul Islam</i>	
Stepped Waveform Generation for Multilevel Inverter Topology Applications .....	219
<i>Majdee Tohtayong, Sheroz Khan, Siti Hajar Yusoff, Mashkuri Yaacob, Musse Muhamud Ahmed, S. M. A. Motakabber, and Ezzidin Hassan Elmabrouk Aboadla</i>	

## **Internet of Things and Big Data**

The Drivers of Broadband Internet in Malaysia .....	225
<i>Saravanan Nathan Lurudusamy and Ramayah Thurasamy</i>	
Health and Wellness Monitoring of Elderly People Using Intelligent Sensing Technique .....	231
<i>Atika Arshad, Sheroz Khan, A.H.M. Zahirul Alam, Rumana Tasnim, and Rounakul Islam Bobby</i>	
i-VRenewal: A Cloud Based System for VISA Renewal: A Case Study of IIUM .....	236
<i>Thouhedul Islam, Rashidah Funke Olanrewaju, and Binyamin Adeniyi Ajayi</i>	
Analysis of Cost Minimization Methods in Geo-distributed Data Centers .....	241
<i>Ayesheh Ahrari Khalaf and Aisha Hassan Abdalla</i>	
Queue Backlog as a Node Metric for RPL Protocol .....	246
<i>Abdullah M.A. Awad, Rosminazuin Ab Rahim, and Aisha Hassan Abdalla Hashim</i>	
Toward Heterogeneous Computing to Facilitate Sequential OLAP Real-Time Applications .....	251
<i>Shihab A. Hameed, Mohamed H. Habaebi, and Haytham I.M. Alzeini</i>	

## **Network Reliability and QoS**

Performance Analysis on Automated and Average Channel Quality Information (CQI) Reporting Algorithm in LTE-A .....	256
<i>Huda Adibah Mohd Ramli and Masturah Ahamad Sukor</i>	
Multipath Interference Minimization in Heterogeneous Wireless Sensor Networks for Reliable Data Transfer .....	261
<i>Kakelli Anil Kumar, K. Shahu Chatrapati, and Addepalli V.N. Krishna</i>	
A Hasty Approach to ECG Person Identification .....	267
<i>Tuerxun Waili, Rizal Mohd Nor, Hamwira Yaacob, Khairul Sidek, and Abdul Wahab Abdul Rahman</i>	
Gripping Motion of Artificial Hand Using EMG Signal .....	272
<i>Md Mozasser Rahman and Muhammad Hadi Mat Rosly</i>	
Link Adaptation Based on Video Quality Monitoring for H.264/AVC Video Transmission over WLANs .....	277
<i>Farah Abdul Rahman and Dimitris Agrafiotis</i>	
No-Reference Spatio-temporal Activity Difference PSNR Estimation .....	283
<i>Farah Abdul Rahman and Ahmad Imran Ibrahim</i>	
Performance Comparison of (Diff-FH NEMO) Scheme in IPv6-Based Network Mobility .....	288
<i>Loay F. Hussein, Aisha Hassan A. Hashim, Mohamed Hadi Habaebi, and Akram M. Zeki</i>	

## Neural Networks and Intelligent Systems

Consumer Load Prediction Based on NARX for Electricity Theft Detection .....	294
<i>Abdullateef Ayodele Isqeel, Salami Momoh-Jimoh Eyiomika, and Tijani Bayo Ismaeel</i>	
Optimization of Fuzzy Neural Network Using Multiobjective NSGA-II .....	300
<i>Monika Gope, Mehnuma Tabassum Omar, and Pintu Chandra Shill</i>	
Development of Particle Swarm Optimization Based Rainfall-Runoff Prediction Model for Pahang River, Pekan .....	306
<i>M. Rabani M. Romlay, M.M. Rashid, and S.F. Toha</i>	
Multiple Convolutional Neural Network Training for Bangla Handwritten Numeral Recognition .....	311
<i>M.A.H. Akhand, Mahtab Ahmed, and M.M. Hafizur Rahman</i>	
Optimal Performance of Inertial Navigation Sensors Using Pseudo Sensor Enhancement Method (PSEM) for Intelligent System Applications .....	316
<i>Yasser M. Madany, El-Sayed A. El-Badawy, and Adel M. Soliman</i>	
Intelligent Parking Allotment System Based on Traffic Prediction .....	321
<i>Jetendra Joshi, Munnangi Harsha, Urijit Kurulkar, Avinash Reddy, Dandamudi Akhil, Byreddy Nikhil Reddy, Shreyansh, and Vanteru Sahithi</i>	
Performance Analysis of Clustering Based Genetic Algorithm .....	327
<i>Athaur Rahman Najeeb, A.M. Aibinu, M.N. Nwohu, M.J.E. Salami, and and H. Bello Salau</i>	

## NextGen Mobile Communications

Performance Study of Path Loss Models for LTE-A Relay Stations .....	332
<i>Mohamad 'Ismat Hafizi bin Mansor and Huda Adibah Mohd Ramli</i>	
Hybrid Channel Gain Access Cell Association for Load Balancing in Downlink LTE-Advanced HetNets .....	337
<i>M.A. Gadam, Chee Kyun Ng, Nor Kamariah Nordin, Aduwati Sali, and Fazirulhisyam Hashim</i>	
Coalition Formation for Throughput Enhancement via One-Sided Matching Theory .....	343
<i>Mohammad Tahir, Mohamed Hadi Habaebi, and Md. Rafiqul Islam</i>	
Modeling of Multiband/Wideband Stack Series Array Antenna Configuration for 5G Application .....	349
<i>Abdinasir Suleiman Osman, Md Rafiqul Islam, and Mohamed Hadi Habaebi</i>	
Equilibrium Analysis for Spectrum Access in Cognitive Radio Networks with Traffic Prioritization .....	355
<i>Mahammad A. Safwat</i>	

Performance Evaluation on Packet Loss Cost of an Enhanced Mobile Multicast Service in Proxy Network Mobility .....	361
<i>Azana Hafizah Mohd Aman, Aisha-Hassan A. Hasim, Azween Abdullah, and Huda Adibah Mohd Ramli</i>	

## **Optical Communications and Photonics**

Haze Impact on Availability of Terrestrial Free Space Optical Link .....	366
<i>Ahmed Basahel, Md. Rafiqul Islam, A.Z. Suriza, and Mohamad Hadi Habaebi</i>	
Modification of Coupling Power Parameters for High Accuracy Coupling Ratio of Weakly Coupled Fiber .....	370
<i>Toto Saktioto, Dedi Irawan, and Jalil Ali</i>	
Electrical Characterization of Commercial GaN LEDs Subjected to Electron Radiation with Different Conveyor Speed per Pass .....	373
<i>Anati Syahirah Hedzir, Norasmahan Muridan, Yusof Abdullah, and Nurul Fadzlin Hasbullah</i>	
Effect of Rain & Haze on Availability of Terrestrial Free Space Optical Link under Tropical Weather Conditions .....	378
<i>Ahmed Basahel, Md. Rafiqul Islam, A.Z. Suriza, and Mohamad Hadi Habaebi</i>	
Quality Analysis of a Photonic Micro-ring Resonator .....	382
<i>M. Rakib Uddin, Teo Kui Siang, Nor Munarah, Muhammad Norfauzi, Nazri Ahmed, and M.A. Salam</i>	
High Rate LDPC Based Decoder Architectures with High Speed ADC for C-RAN Optical Fronthaul .....	386
<i>Ao Li, Vahid Meghdadi, Jean-Pierre Cances, and Christelle Aupetit-Berthelemot</i>	

## **RF and Microwave Circuits and Devices**

Sierpinski Carpet Fractal Antenna with Harmonic Suppression Capability .....	392
<i>Nordalyana Murni Fadzil, Shipun Anuar Hamzah, Abdirahman Mohamud Shire, Khairun Nidzam Ramli, Fauziahanim Che Seman, Mazlina Esa, and Nik Noordini Nik Abd Malik</i>	
FMCW Radar for Slow Moving Target Detection: Design and Performance Analysis .....	396
<i>Nor Fatin Muhd Ariffin, Farah Nadia Mohd Isa, and Ahmad Fadzil Ismail</i>	
Channel Parameters and Distance Estimation in Wireless Sensor Networks Based on Maximum Likelihood Estimation Method .....	400
<i>Kaiyisah Hanis Mohd Azmi, Stevan Berber, and Michael J. Neve</i>	
Design of a Circular Patch Antenna for 3D Printing .....	406
<i>Athirah Mohd Ramly, Norun Abdul Malek, Sarah Yasmin Mohamad, and Masturah Ahamad Sukor</i>	

Design and Optimization of Multi-layer Spiral Inductor for Low Pass Filter Application .....	411
<i>Qian Zhang, Lei Yue, and Yingjie LI</i>	
Harvesting WiFi Received Signal Strength Indicator (RSSI) for Control/Automation System in SOHO Indoor Environment with ESP8266 .....	416
<i>Mohamed Hadi Habaebi and Nur Izzati Nabilah Bt Azizan</i>	

## **Satellite and Wireless Communications**

Mobile Heart Rate Detection System (MoHeRDS) for Early Warning of Potentially-Fatal Heart Diseases .....	422
<i>Rafhanah Shazwani Binti Rosli and Rashidah Funke Olanrewaju</i>	
Comparative Investigation on CSMA/CA-Based MAC Protocols for Scalable Networks .....	428
<i>Ali. M.H. Abbas, Jahan Ali, Md Arafatur Rahman, and Saiful Azad</i>	
Effect of Plasma Parameters on Monopole Plasma Antenna Performance .....	434
<i>A.N. Dagang, N.F. Ramli, N.S. Alias, and M.T. Ali</i>	
Design and Optimization of Dual Band Microstrip Patch Antenna Using Slots Pair .....	439
<i>Adel A.A. Alsaleh, Md. Rafiqul Islam, Mimi Aminah Wan Nordin, and Shadi Al-Askari</i>	
Rain Rate Distribution for Satellite to Earth Microwave Links Design in Libya .....	443
<i>Asma Ali Hussein Budalal, Md Rafiqul Islam, Mohamed Hadi Habaebi, and Musse Mohamud Ahmed</i>	
SDR-Based Transceiver of Digital Communication System Using USRP and GNU Radio .....	449
<i>Jusnaini Muslimin, Ani Liza Asnawi, Ahmad Fadzil Ismail, and Ahmad Zamani Jusoh</i>	
Radiation Characteristics and SEU Rates in NEqO Environment Using SPENVIS .....	454
<i>Souaad, Manzar, Rosminazuin Bt. Ab. Rahim, Sharizal Fadlie Sabri, and Nurul Fadzlin Hasbullah</i>	
The Effect of Haze Attenuation on Free Space Optics Communication (FSO) at Two Wavelengths under Malaysia Weather .....	459
<i>Mohamed M. Shumani, M.F.L. Abdullah, and A.Z. Suriza</i>	

## Signal and Image Processing

Altitude Tracking Using Colour Marker Based Navigation System for Image Guided Surgery .....	465
<i>Nur'Ain Saaidon, Wahju Sediono, and Ali Sophian</i>	
Low Rank Parity Check Codes Against Reed-Solomon Codes for Narrow-Band PLC Smart Grid Networks .....	470
<i>Yazbek Abdul Karim, El-Qachchach Imad, Cances Jean-Pierre, and Meghdadi Vahid</i>	
Video Streaming Based on Frames Skipping and Interpolation Techniques .....	475
<i>Fadlallah Ali Fadlallah, Othman O. Khalifa, and Aisha Hassan Abdalla</i>	
Estimating Direct Waves with Respect to Receiver Offset, Antenna Current and Frequency in MCSEM .....	480
<i>Tadiwa Elisha Nyamasvisva, Noorhana Yahya, Halabi B. Hasbullah, Muhammad Rauf, Amir Rostami, and Elsayed Dahy</i>	
Neural Networks for Lampung Characters Handwritten Recognition .....	485
<i>Helmy Fitriawan, Ariyanto, and Hendri Setiawan</i>	
Speech Enhancement in Non-stationary Noise Using Compressive Sensing .....	489
<i>Amart Sulong, Teddy Surya Gunawan, Othman O. Khalifa, and Mira Kartiwi</i>	

## VLSI and MEMS Design

Triangular Shaped Silicon Nanowire FET Characterization Using COMSOL Multiphysics .....	494
<i>Mohamed Jameel Yazeer, Nor Farahidah Za'bah, and A.H.M. Zahirula Alam</i>	
An Analysis of Interpolation Implementation for LNS Addition and Subtraction Function in Positive Region .....	499
<i>Siti Zarina Md Naziri, Rizalafande Che Ismail, and Ali Yeon Md Shakaff</i>	
Design and Simulation of MEMS Helmholtz Resonator for Acoustic Energy Harvester .....	505
<i>Rosminazuin Ab Rahim and Muhammad Jabrullah Bin Johari</i>	
Finite Element Method Simulation of MEMS Piezoelectric Energy Harvester Using Lead-Free Material .....	511
<i>Maziati Akmal Mohd Hatta, Mohd Warikh Abd Rashid, Umar Al-Amani Haji Azlan, Kok Swee Leong, and Nurul Azuwa Azmi</i>	
Investigation of Acoustic Wavelength Effects on Silicon Compatible Al Doped ZnO SAW Resonator .....	516
<i>Aliza Aini Md Ralib and Anis Nurashikin Nordin</i>	

Packing Density and Message Traffic Density of a Midimew Connected Mesh Network .....	520
<i>M.M. Hafizur Rahman, Faiz Al Faisal, Rizal Mohd Nor, Tengku Mohd Tengku Sembok, M.A.H. Akhand, and Yasushi Inoguchi</i>	
Linear Sure Bootstraper: Self-Stabilizing Nodes For Network Construction .....	525
<i>Abdulfatah Muhyiddeen, Rizal Mohd Nor, and M.H. Hafizur Rahman</i>	
<b>Author Index</b> .....	<b>531</b>

## MESSAGE FROM THE PRESIDENT, IIUM

**Y.BHG. Tan Sri Dato' Seri Utama Dr. Rais Yatim**  
President  
International Islamic University Malaysia

*Assalamu 'alaikum Warahmatullahi Wabarakatuh*

I am extremely delighted to welcome all participants to the IIUM Engineering Congress 2016 (IEC 2016). I wish your participation in the Congress would be worthwhile and a good start to foster more collaboration in the future. The IEC 2016 marks another milestone for the Kulliyah of Engineering at IIUM and I am pleased to share this achievement.

Last year, I called upon universities in the country to work together to de-westernise and redefine the higher education and the knowledge they are providing. The time has come for our academic institutions to form our own worldviews instead of following the directions prescribed by our former colonial masters and the West. IIUM, via academic activities like this Congress, is revisiting and strengthening its position in the Islamization of knowledge.

The Kulliyah of Engineering, since its establishment in 1994, provides quality engineering and research, and has the goal of being a “World Class Centre of Engineering Education and Research with Values and Ethics.” The Kulliyah prides itself in producing alumni that are progressively redefining and shaping our world. The graduates have exemplified the achievement of excellence in diverse fields of engineering. They are greatly awaited by various multinational companies around the world for various positions. Some graduates pursue their education in well-known engineering colleges, while others excel in business sectors.

Today, IEC 2016 witnesses the amalgamation of local and international scholars. Engineers, academicians, and scientists will be presenting more than 400 academic papers. The conference proceedings articulates the deliberations and breakthroughs which will hopefully lead to complementary or better solutions to the global community woes. Published papers are well vetted and thoroughly reviewed by experts and I am convinced that the majority of authors will make their way further into the real world. We hope to see patents emerging from IEC 2016 Insha' Allah.

My sincere gratitude to IIUM, Kulliyah of Engineering and organizing committees of IEC 2016 for a job well done!

*Wassalam.*

**Honorable Y.BHG. Tan Sri Dato' Seri Utama Dr. Rais Yatim**  
President of International Islamic University Malaysia

## MESSAGE FROM THE RECTOR, IIUM

**Prof. Dato Sri Dr. Zaleha Kamaruddin**  
Rector  
International Islamic University Malaysia

In the Name of Allah, Most Gracious, Most Merciful.

*Assalamu 'alaikum Warahmatullahi Wabarakatuh*

It is indeed a pleasure and a privilege for our Kulliyah of Engineering to organize the IIUM Engineering Congress 2106 comprising three conferences: (1) the 6th International Conference on Computer and Communication Engineering (ICCCE 2016), (2) the 4th International Conference on Biotechnology Engineering 2016 (ICBioE 2016), and (3) the International Conference on Mechanical, Automotive and Aerospace Engineering 2016 ( ICMAAE 2016).

By organizing and participating in such conferences, it is hoped that members of the Kulliyah of Engineering will develop and share new knowledge with colleagues and researchers worldwide. It is my fervent hope that the staff at IIUM will work hard to revitalize the scientific research culture of the Muslim ummah and bring it back on the right path, reminiscent of its glorious past.

I am sure that this conference will provide a platform for an intellectual exchange of ideas and experiences of academic and industrial research, which will greatly benefit the participants.

I take this opportunity to wish all delegates a productive conference and pleasant stay in Malaysia.

*Wassalam.*

**Professor Dato' Sri Dr. Zaleha Kamaruddin**  
Rector  
International Islamic University Malaysia

## *Foreword from the ICCCE2016 Chairman*

**Assoc. Prof. Dr. Teddy Surya Gunawan, SMIEEE, MIET, CEng**

Chairman

International Conference on Computer and Communication Engineering (ICCCE'16)

Kulliyah of Engineering

International Islamic University Malaysia

*Assalammu'alaikum Warahmatullaahi Wabarakaatuh*

I would like to extend my warmest welcome to the participants of the 6<sup>th</sup> International Conference on Computer and Communication Engineering 2016 (2016) organized by the Department of Electrical and Computer Engineering (ECE), Faculty of Engineering, International Islamic University Malaysia. The theme of this conference is ***Innovative Technologies to Serve Humanity***. The conference provides a good platform for fellow colleagues and students to share, discuss, and collaborate on knowledge and findings while expanding networks. The ICCCE'16 have followed the IEEE guidelines of blind-review process. At an acceptance rate around 69% out of 148 total submissions through EDAS from around 20 countries.

I would like to express my sincere gratitude to the organizing committee and everybody who have worked very hard to make this conference a reality and successful. I would like to express my deepest gratitude to the distinguished keynote speakers, International Advisory Board members and sponsors. I am also grateful to all the reviewers, as without their effort the high quality standard for the conference could not have been possible.

Finally, I wish all of you a pleasant stay in this country and we hope that ICCCE'16 will be successful and enjoyable for all participants.

*Wassalam*

**Assoc. Prof. Dr. Teddy Surya Gunawan, SMIEEE, MIET, CEng**

**Head of Electrical and Computer Engineering Department**

**Kulliyah of Engineering**

**Chairman of ICCCE 2016**

# ICCCE 2016 Organizing Committee

## **Chairman**

Teddy Surya Gunawan

# Neural Networks for Lampung Characters Handwritten Recognition

Helmy Fitriawan, Ariyanto, Hendri Setiawan  
 Department of Electrical Engineering  
 Faculty of Engineering, University of Lampung  
 Bandar Lampung, Indonesia  
 e-mail: helmy.fitriawan@eng.unila.ac.id

**Abstract**— Character recognition technique associates a symbolic identity with the image of a character. Different characters and languages have different structures and features. Lampung character and language are different with any other languages. We have developed Lampung handwritten character recognition using back-propagation neural networks. However since some Lampung characters have similar features, hierarchical network system was performed to optimize the training and recognition algorithm. The experiment results give reasonable results of the recognition rate for the training set. 86.5% of basic characters and more than 97% for characters with tone marks can be recognized.

**Keywords**—handritten recognition; Lampung characters; artificial neural networks; backpropagation

## I. INTRODUCTION

The developments of digitizing tablets, personal computer, and image processing technologies have driven character recognition to grow to be an area of active research. Moreover, the latest invention of input devices for computer systems also extends this research area [1]. A character recognition technique associates a symbolic identity with the image of a character. Handwritten recognition is the ability to read and understand human language in written form and the information is then recorded in the digital form to be other uses. Currently many researchers in handwritten character recognition are carried out to classify English characters/words. Recently, there are also research interest in non-English character recognition, such as Thai [2], Japan [2,3], Chinese [4], and Korean [5].

Different characters and languages have different structures and features. Lampung character and language are different with any other languages [6]. Lampung character has complex and unique characteristics, composed from curves, zig-zag, and symbols. The Lampung script is written from left to right in a cursive manner, which is handwriting style that is designed for writing notes and letters quickly by hand. The goal of Lampung handwritten character recognition is to make a computer understand and identify which Lampung character a human wrote [7]. This research may be applied to many different types of information sources. For example, transformations and translations of handwritten ancient documents of Lampung language into text files.

In this paper, we report an effort to develop an automatic handwritten recognition system for Lampung characters with

high recognition accuracy and minimum training time. This study shows that the approach used in this research is giving high recognition accuracy and minimum training time.

TABLE I. LAMPUNG BASIC LETTERS

Sound	Character Image	Sound	Character Image
Ka		Ja	
Ga		Nya	
Nga		Ya	
Pa		A	
Ba		La	
Ma		Ra	
Ta		Sa	
Da		Wa	
Na		Ha	
Ca		Gha	

TABLE II. UPPER TONE MARKS

Sound	Character Image
Ulan "i"	
Ulan "e"	
Bicek "e"	
Rejunjung "r"	
Tekelubung "ng"	
Datas "an"	

TABLE III. LOWER TONE MARKS

Sound	Character Image
Bicek "o"	----- 
Bitan "u"	----- 
Tekelungau "au"	----- u

TABLE IV. SUBSEQUENT TONE MARKS

Sound	Character Image
Kelengiah "ah"	-----
Tekelingai "ai"	----- s
Ngengen	-----

Basically, Lampung letters consist of 20 basic characters as shown in Table. I. Those of 20 basic characters are; "ka", "ga", "nga", "pa", "ba", "ma", "ta", "da", "na", "ca", "ja", "nya", "ya", "a", "la", "ra", "sa", "wa", "ha", "gha". Beside the basic letters, there are tone marks that change the sound of the basic characters. There are three types of tone marks, depend on where they are written, i.e. upper tone (above the basic letters), lower tone (below the basic letters), and subsequent tone marks (ahead the basic letters). There are totally 12 tone marks as shown in Tables II, III and IV. For example character of "Ka", added with upper tone mark of "Ulan e", is written and spelled "Ke".

## II. THE RECOGNITION SYSTEM

Two phase processes are involved in our recognition system: the image pre-processing and neural network. The pre-processing step is required to prepare and manipulate the characters for feeding as input to the neural network. Further, the backpropagation neural network is performed to recognize the characters.

### A. Pre-processing

The data were obtained from native Lampung writers contributed to total 50 set of sample data. Each set consists of 260 characters (20 main characters without tone marks and 20 main characters with 12 tone marks). Therefore, total data of 13,000 character images (50 x 260) will be obtained. Then, all collected data are converted to bitmap format by a scanner device. The character image is fed into the preprocessing step. Handwritten character images often have large variations in size and position, thus it is needed to reduce the unnecessary coordinate sequence data in the preprocessing step [8]. The pre-processing phase consists of 5 (five) sub-processes, which are: 1) binarization, slicing, inverting, cropping, and resizing. Each sub-process has the following details.

1) *Binarization*: The image binarization step make a conversion of a colored or gray-scale image into a binary image. A binary image generally is represented by 2-dimension matrix which has two intensity values ("0" and "1"). We used global thresholding category of binarization which picks one thresholding value for entire image. It is based on an estimation of the background level from the intensity histogram image to differentiate an object from the background as shown In Fig. 1.

Figure 1. Binarization process.

2) *Slicing*: The slicing approach is performed to segment a binary image into one single character as seen in Fig. 2. The result of this step is the image consists of one primitive character.

Figure 2. Slicing process.

3) *Inverting*: In digital image processing, inverting means changing the white colour into black, and vice versa. Fig. 3. shows the process of inverting image.

Figure 3. Inverting process.

4) *Cropping*: Cropping is performed to remove the outer parts of an image to increase framing. As shown in Fig. 4.,

cropping emphasizes the subject and changes the aspect ratio.

Figure 4. Cropping process.

5) *Resizing*: Image resizing step is carried out by interpolation method. Interpolation is a method to increase or decrease number of pixels in one digital image. Here, the image is reduced into 20 x 40 pixels image as illustrated in Fig. 5.

Figure 5. Resizing process.

Next step is the digitization of the segment grids because neural networks need their inputs to be in the form of binary

digits ("0" and "1"). Neural networks having different parameters are used to recognize each characters. Each digitize segment out of 800 segmented grids is then employed as input of neural network, as illustrated in Fig. 6.

Figure 6. Image conversion into vectors.

### B. Neural Networks

In the training step, artificial neural network with backpropagation method is performed. The training result is evaluated to obtain the recognition rate for each character image. Backpropagation uses the gradient decrease method to minimize total squared error of the network output. However since some characters have similar pattern then hierarchical training is performed to train those character images. For some similar characters the training process is performed repeatedly. Characters are classified into four groups, i.e. basic characters, upper tone marks, lower tone marks, subsequent tone marks. This step is illustrated in Fig. 7.

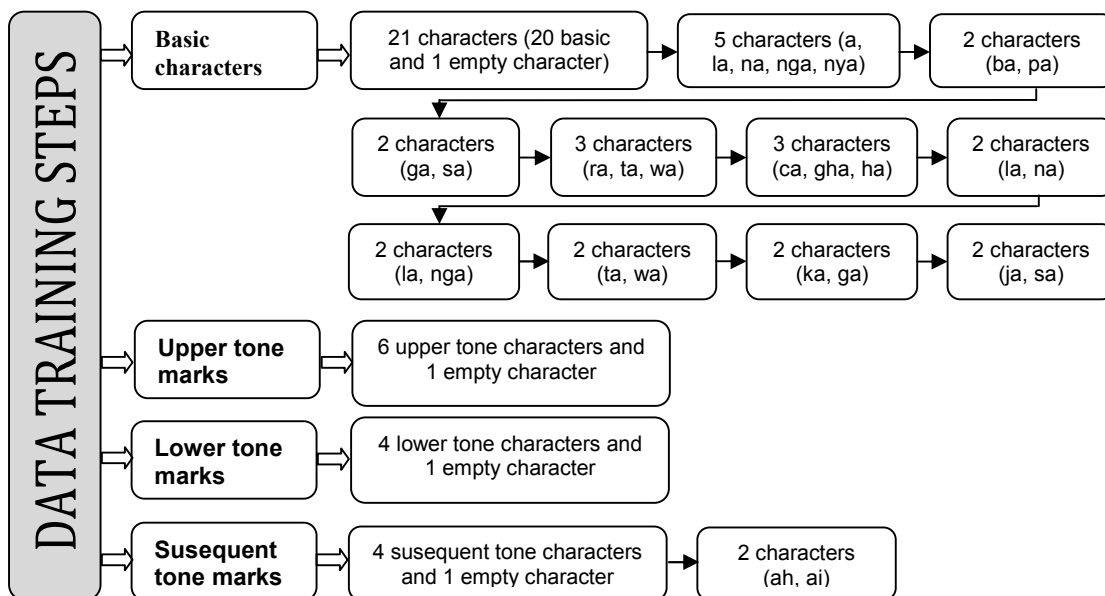

Figure 7. Data training steps.

### III. RESULTS

In order to evaluate our method, the recognition system was trained based on the all collected data. The backpropagation method of artificial neural network with hierarchical training was performed. After we performed the data training step, the following results were obtained as seen in Table V. The results have more than 80% of accuracy rates for all cases. However, the accuracy results for some dominantly similar characters are somewhat lower than others.

TABLE V. ACCURACY RESULTS OF NN TRAINING

Training characters	Accuracy result
20 basic and 1 empty characters	86.5%
5 characters (a, la, na, nga, nya)	81.4%
2 characters (ba, pa)	98.7%
2 characters (ga, sa)	85.4%
3 characters (ra, ta, wa)	92.1%
3 characters (ca, gha, ha)	95.6%
2 characters (la, na)	96.8%
2 characters (la, nga)	89.8%
2 characters (ta, wa)	98.7%
2 characters (ka, ga)	99.6%
2 characters (ja, sa)	97.7%
6 upper tone and 1 empty characters	99.6%
4 lower tone and 1 empty characters	99.8%
4 subsequent tone and 1 empty characters	97.3%
2 subsequent tone characters (ah, ai)	100%

### IV. CONCLUSION

This paper presents a simple technique for Lampung handwritten character recognition. Training algorithm used in this research is back-propagation neural networks. The

hierarchical network system was performed to optimize the training and recognition algorithm. The global feature is extracted to form reliable representation of a handwritten character. The training was performed based on all collected data from Lampung native handwriters with more than 80% of accuracy rates for all characters.

### ACKNOWLEDGMENT

We would like to thank the Directorate General of Higher Education, Ministry of National Education of Republic of Indonesia for financially support this research.
