

Volume 2, Number 2 - October, 2008

- Exact Algorithm for The Interval Flow Transportation Problem with Uniform Conditional Lower Bounds
Nora Aji
- Improving Efficiency of Motorcycle Taxi Operation: A Case Study in Bandar Lampung Indonesia
Sulistyo Armitono
- Strategic Approach of Seaports: Qualitative Evidences of A Portuguese Seaport
Susana Garrido Azevedo and João Ferreira
- Integrated Purchasing and Production Planning Multi-workstation Multi-level Capacitated Lot Sizing Model
Suzakanya Chirprateep and Rein Boondiskulchok
- Research on The Optimal Theoretical Value of Enterprise Logistics Service Level
Yu-heng Huang and Juan Wang
- The Analysis and Assessment of Hub and Spoke Implementation: A Case Study of Thai's Industrial Park
Nanchana Kanchanasuntorn and Nutanaree Sukseksan
- Path Finding Algorithm on Fuzzy Travel Cost Condition
Widojo Cahyo Kresnanto, Ofyar Z. Tamin and Russ Bona F
- Third Method Capacity Analysis: Mixed Traffic Flow at Unsignalized Intersection
Jawono Prasetijo, Meor Othman Hamzah and Ning Wu
- The Application of Gravity Model Combined with Multinomial Logit Model Under Equilibrium Assignment
Rahayu Sulistyorini, Ofyar Z. Tamin and Ade Sjafruddin
- Managing Logistics System and Creating Sustaining Natural-based Tourism on Koh Lan Coral Island
Taweesak Theppitak
