Assalamualaikum Wr. Wb. Bu Dr Sri Hidayati,
Semoga bu Sri & keluarga senantiasa sehat dan dim lindunganNYA amiin.
Alhamdulillah...sudah dapat hasil dan Reviewernya.
Berikut saya lampirkan berkas (manuskrip) untuk di revisi, sekian dan terima kasih.

Wassalam,

Manuscript Number: JMRT-D-20-00721

Lignin isolation from black liquor from oil palm empty fruit bunch using acid

Dear Dr Fudholi,

Thank you for submitting your manuscript to Journal of Materials Research and Technology.

I have completed my evaluation of your manuscript. The reviewers recommend reconsideration of your manuscript following major revision. I invite you to resubmit your manuscript after addressing the comments below. Please resubmit your revised manuscript by Aug 07, 2020.

When revising your manuscript, please consider all issues mentioned in the reviewers' comments carefully: please outline every change made in response to their comments and provide suitable rebuttals for any comments not addressed. Please note that your revised submission may need to be re-reviewed.

To submit your revised manuscript, please log in as an author at <https://www.editorialmanager.com/jmrt/> and navigate to the "Submissions Needing Revision" folder.

Journal of Materials Research and Technology values your contribution and I look forward to receiving your revised manuscript.

Kind regards,
Po-Yu Chen
Coeditor

Journal of Materials Research and Technology

Editor and Reviewer comments:

Reviewer #1: This manuscript is reviewed the lignin isolation from black liquor based on oil palm empty fruit bunch using an acid solution. In overall, I would like to suggest a major revision in the article due to the following reasons:

- The title does not representative study, the author should be revised the title.
- The English language should be improved.
- The abstract should be revised, the authors should explain the main introduction to highlight this manuscript.
- In the introduction and results and discussion, the author must increase discussion related to results of lignin isolation and isolation methods. The data collected has good representation but the writer needs high discussion.
- The use of HCl solution for isolation is needed attention against environmental damage.
- Figure 5 required correction. The X and y-axis have no description and writing H2SO4 needed correction.
- The authors should be improving in high discussion related to SEM-EDX section.
- The conceptual approach to isolating lignin can explain the derivative compounds of p-coumaryl, coniferin and synapyl alcohol based on Table 1.

Reviewer #2:

Abstract. This study aims...

Oil palm in Keywords

Introduction is too short.

Last paragraph of Introduction is about research question and gap. Keep it longer.

Section 3.6 devoid of support from literature

Payment for JMRTEC_2054

Ahmad Fudholi <a.fudholi@gmail.com>

to OAEIsevierInvoicesNoReply, Researcher, me

Tue, Aug 25, 11:14 AM

Dear Editor/ Researcher Support of Elsevier

I hope you are in good health.

Attached payment for our manuscript (JMRTEC_2054: Lignin isolation from black liquor from oil palm empty fruit bunch using acid).

Thank you for your attention and cooperation.

Best regards,

A. Fudholi, Ph.D
