Application for Review of Biodiversity's Journal

To: EePhin.Wong@nottingham.edu.my

Hallo again.

Thank you for all you have given to me. May your goodness get the best reward from the God. Very interesting to read some of your papers. This is my article

W

Template

BIODIV...1).docx

there will be a slight map change in this article (Map in english).

Thankyou again.

Have a nice day.

Best Wishes,

Della Tiara Monik.

To: Della Tiara Monik

Dear Della,

Can you give me until next week 29th Oct to review your paper?

Thank you.

*best wishes,*

*Ee Phin*

Application for Review of Biodiversity's Journal

To: Ahimsa Campos-Arceiz

Good morning 🙏.

Sorry to disturb your time 🙏.

Let me introduce myself, my name is Della Tiara Monik, a student of the Master of Environmental Science, the University of Lampung in Indonesia. I am currently in the process of writing articles and theses. in connection with several articles that you wrote about Elephants. if you agree, would you like to review my article which is planned to be published in the Journal of Biological Diversity entitled "Analysis of the Sumatran Elephant (*Elephas Maksimus Sumatranus*) in KPH Kotaagung Utara as a Potential Tourism Object"

this means a lot for me, thank you in advance.

Good morning 🙏

Re: Application for Review of Biodiversity's Journal

To: Della Tiara Monik

Dear Della,

please to 'meet' you. Great to hear about your work on elephants and ecotourism.

I will be pleased to review your paper. The only thing is that I have a number of commitments, so I might not be fast doing it. But I will be happy to provide my feedback.

Best,

Ahimsa

Re: Application for Review of Biodiversity's Journal

To: Della Tiara Monik

Dear Della Tiara Monik,

thank you for sending me your manuscript. I am happy that you and your colleagues are interested in Sumatran elephants. It is certainly important that more research is done!

I did not have much time to look at the text, but I have inserted a few suggestions (see attached). In general, I would recommend consulting a native speaker to proofread the English text. Furthermore, I would advise you to include more international literature - as this is intended to be an international publication in English. There is a lot of research on elephants and the Sumatran subspecies in particular that was published in English, but you hardly cite any. Is there a particular reason for this?

What is the research question?

Most of the discussion is general information or information that belongs rather to the introduction or material and methods section. It is not really clear which part is the result of your research (e.g. the result of the questionnaire survey), and which part stems from the literature.

I hope that my comments help a little. I have to admit that I did not understand what your paper is about, it is very confusing. I am only used to scientific papers, this is something entirely different, more a description filled in with some field impressions and opinions retrieved from interviews.

I do not want to be too negative, I assume it is your first attempt to write up an international publication. It's not an easy thing to do, and I appreciate your motivation to do so! Writing scientific papers is something you have to learn, it is a process that takes time. Maybe there is a scientist at your university that can support you? I would suggest to first put together a proper concept, including a clear definition of the research questions, the research methods. Then draft a clear outline of the paper (including all the different sections).

Good luck!

Best wishes, Alex

DG

Wa'alaikum salam wr.wb.

Mbak Della, apa ada format reviewnya? Jika tidak, nanti saya sampaikan dalam file word ya.

Terkait kuisisioner, kira-kira apa saja pertanyaanya? Soalnya di paper tidak cukup dijelaskan? " Direct observation and interview were used to collect the primary data. In-depth interviews were conducted with the society around KPH Kotaagung Utara by using *snowball* technique. Structured interviews were conducted with the Head of KPH Kotaagung Utara. Interviews were used to determine the society's perspective and the manager of KPH Kota Agung Utara towards the planning of tourism object. The method used for interview was questionnaires. The data were collected on interviews: the society's perspective of elephants, the elephant's existence specifically, and elephant's potential tourism object in KPH Kota Agung Utara

Untuk peta calon lokasi dan analisis securitynya seperti apa bentuk zonasinya?Saya rasa in penting untuk diperlihatkan di wilayah mana lokasi rencananya. Jika itu di peta di picture 1, maka perlu dibuat skala yang leih detil.

Saya akan review per bgaian natinya. Pertanyaan di atas hanya awalan saja untuk lebih mendapat gambaran yang utuh.

Salam,  
Donny
