## Comments to Authors

1. In general the manuscript has been explained well, the method is relevant and operational
2. The problems raised in the abstract have not shown any relevance to the research conducted by conducting bibliometric analysis. the problem should be specified and related to the urgency of the research being carried out
3. In the introduction, it is necessary to mention what problems are found in learning foreign languages (Indonesian). Various online learning problems may be referred to: <http://www.ijiet.org/show-168-2035-1.html>
4. The usefulness of bibliometric research lies in its research suggestions. It is necessary to add the most suitable suggestions from some of the articles analyzed, especially those relating to the use of educational technology for Indonesian language learning (this shows compliance with the scope of the journal)
