- NOVERMAN DUADJI** - Thu, Nov 11, 2021, 4:23 PM.

The Windows taskbar at the bottom shows the time as 7:31 PM on 4/6/2022.

### Korespondensi 4

The screenshot shows a Gmail inbox on a desktop browser. The browser tabs include 'Login | International Journal of D...', 'Article progress information - no', and 'Google Terjemahan'. The address bar shows the URL 'mail.google.com/mail/u/1/#sent/KtbxLwhCFzJpbFqkrWQLhDljpGVTCTQVB'. The Gmail interface includes the search bar with the text 'in:sent', a filter dropdown set to 'Active', and a navigation bar with icons for compose, back, archive, trash, mail, clock, refresh, forward, and print. The email list shows one message:

- NOVERMAN DUADJI** (to vivienne.liu) - 5:34 PM (0 minutes ago). Subject: Article progress information.

The email content is as follows:

Dear Vivienne Liu | Assistant Editor

Our article is entitled: "Can the Implementation of Conservation Village Increase the Environmental Support in Forest Management in Bukit Barisan Selatan National Park, Lampung, Indonesia"  
Author: Noverman Duadji et al

Our article has been uploaded with ID number of the manuscript: 13612.  
Previously we had submitted it to the International Journal of Design & Nature and Ecodynamics (JDNE), but we received and approved an email to transfer the manuscript to the International Journal of Sustainable Development and Planning journal.

May we ask about the progress of our article.

We really hope to get a review from the IJSDP journal reviewers.

If it comes, we will be ready to fix it.

We look forward to receiving information from the editor.  
Success for IJSDP journal

The Windows taskbar at the bottom shows the time as 5:35 PM on 2/18/2022.

## Korespondensi 5

The screenshot shows a Gmail inbox with one email from Noverman Duadji. The email is dated March 19, 2022, at 12:15 PM. The subject is "Dear Editor". The body of the email contains the following text:

Dear Editor

Our manuscript is entitled: "Can the Implementation of Conservation Villages Improve Environmental Supporting Capacity in Forest Management in Bukit Barisan Selatan National Park, Lampung, Indonesia"  
Manuscript author: Noverman Duadji et al

Our article has been uploaded to the journal Journal of Design & Nature and Ecodynamics (JDNE) with manuscript ID number: 13612.

In November 2021, we received an email for approval of the manuscript transfer to the International Journal of Sustainable Development and Planning journal.

The author agrees to the transfer.

May we ask about the progress of our article.

We sincerely hope to receive a review by the IJSDP journal reviewers: reputable and professional.

We highly review the script later, if it comes, we will be ready to fix it.

We re-attach the following:  
1. Articles and similarity check;  
2. Correspondence

Success for IJSDP journal

Regards,  
Assoc Prof Dr Noverman Duadji

This screenshot shows the same email from Noverman Duadji, but with the attachments section expanded. The email body is partially visible, showing the text from the previous screenshot. The attachments section is titled "3 Attachments" and contains three files:

- Manuskrip\_Can the...
- Similirity Check\_Ca...
- Correspondence.pdf

The taskbar at the bottom of the screen shows the time as 7:35 PM on 4/6/2022.

## Korespondensi 6

The screenshot shows a Gmail interface with a search bar containing "in:sent". The email list shows an email from "editor.ijsdp@iieta.org" received on "Mon, Mar 21, 5:41 PM". The email content is as follows:

Dear author,  
Thanks for your email.  
We will accelerate the review process.  
King regards,

Dear author,

Thank you for contributing your paper to INTERNATIONAL JOURNAL OF SUSTAINABLE DEVELOPMENT AND PLANNING!

- Please revise your paper according to the attached comments.
- Highlight the revised parts in the final version of your paper and give a response according to review comments.
- Please typeset your paper according to template.

To ensure fast publication of your paper, please return your revised manuscript and answers to all queries to this email before **21 April, 2022**. Thus, we have enough time to process your manuscript in the next step. For further assistance, please do not hesitate to contact us via this email.

We would like to take this opportunity to thank you for choosing *International Journal of Sustainable Development and Planning* as your publishing medium and hope that we will receive further submissions from you in the future.

Best regards,

**IJSDP Editorial Board**

Dear IJSDP Editors

Article entitled: Can the Implementation of Conservation Village Increase the Environmental Support in Forest Management in Bukit Barisan Selatan National Park, Lampung, Indonesia?  
manuscript : IJSDP 13612

We thank you for reviewing the manuscript.

The author has fixed and done a few things:

1. It has been revised according to the review comments.
2. Type the paper according to the template.
3. Point-by-point responses to the author's comments on the author's response sheet
4. the results of the second similarity/tumitin check after revision

We will send the manuscript today, April 20, 2022.

The author is happy to get reviewer feedback and has fixed it. Our manuscript became very good after following the review of journal reviewers.

Regards,

Assoc. Prof. Dr. Noverman Duadj

Reply Forward

7:06 AM 4/20/2022

Dear Editor IJSDP

We have revised the paper according to the review comments.  
The writing team provides a point-by-point response to the author's comments, as follows.

**Table 1.** Author's Response

<b>ABSTRACT</b>
<p><b>Reviewers' Comments</b></p> <p>There are some ambiguities in the expression of this part. It is recommended to pay attention to the use of pronouns.</p> <p>In my opinion, giving professional results directly in the introduction part is not convenient for readers to understand</p>
<p><b>Author's Response</b></p> <p>The author team has refined the Abstract by including the research method, research objectives, and summarizing in more detail and clearly.</p> <p><b>Abstract</b></p> <p><b>This study analyzes the success of implementing a conservation village in obtaining environmental support in forest management in the Bukit Barisan National Park. This research uses a qualitative case study method, reinforced by a desk review of relevant research literature. Interviews and focus group discussions were conducted to gain a deeper understanding of how successful policy implementation was Conservation Village in economic and conservation-based community empowerment in the TNBBS area. The success of policy implementation is reviewed by analysis of marketing policies and further analysis using a matrix of environmental reactions to policy implementation.</b> The study results indicate that marketing policies in terms of policy acceptance and adoption have failed/successful and in terms of strategic readiness, successful with the establishment of a conservation task force tasked with managing and monitoring forest products and implementing this conservation village agreement. The community is an important part of the policy. The village government fully supports being the implementer of the policy. It is manifested in the form of providing access and facilities and for NGOs to provide full support through the provision of budgetary resources and facilitators for training and counseling related to building awareness to save forests.</p>
<b>INTRODUCTION</b>
<p><b>Reviewers' Comments</b></p> <p>How does the national park strategy's support of surrounding living systems affect the water harvesting of surrounding communities?</p> <p>In my opinion, the author's introduction to the research background is not comprehensive enough. It is not enough to simply introduce the environmental background of the Indonesian survey area. It is necessary to explain the forest management status of the national park itself.</p>
<p><b>Author's Response</b></p> <p>The author's team provides additional details in the introduction on the support of the national park strategy for living systems and water resources and provides details related to the current status of national park management.</p> <p><b>Using the Field School Strategy, efforts are being made to maintain a sustainable source of livelihood in the southern Bukit Barisan National Park. This strategy aims to provide understanding, skills, and encourage farmers to implement sustainable agriculture. In the buffer zone of the Bukit Barisan Selatan National Park, it can be seen that there has been significant progress since the "Coffee and Conservation" campaign was conducted in early 2007, which was part of the continuation strategy of the field school. Every coffee company is starting to adopt and support sustainable agriculture efforts. The</b></p>

**management status of the Bukit Barisan Selatan National Park was originally a Wildlife Reserve Area. Then 2007, In 2007, the South Sumatra Wildlife Reserve area was declared a TNBBS area until now.**

#### **THEORETICAL REVIEW**

##### **Reviewers' Comments**

Misspelled word, it should be "theoretical" instead of "theoretical".

What does the abbreviation "KKP" stand for? It is recommended not to abbreviate technical terms that appear once.

Has the implementation of public policies supported the outcome of forest environmental management?

The impact of the existence of different stakeholders in the protected area on the division of responsibilities for the protected area should be considered,

##### **Author's Response**

The author team has corrected the spelling error in words that should be **"theoretical" instead of "theoretical"**.

The author team has also corrected sentences that shouldn't be abbreviations and will pay more attention to them.

The following are important implementation points that support the management of forest products and the effective distribution of responsibilities to each stakeholder:

**The management of conservation areas aims to prevent damage to the function of the environmental order so that it can support social needs and improve the economy of the community and forest products around the conservation area. With this management objective, it will be followed by improving the environmental functions of soil, water, climate, plants, and animals as well as the historical and cultural values of the nation.**

**Activities Stakeholder maps** all relevant stakeholders, including affected parties, government agencies, and other institutions such as NGOs with project activities, local media, religious and customary leaders, academics in relevant disciplines, and others. Including the initial direct involvement of stakeholders, then a focused meeting was held in Bandar Lampung, which was the beginning of uniting interests for stakeholders with the main objective of relating to National Parks and coffee farmers. The provincial government, the Director-General of the Ministry of Environment and National Park Management with partner NGOs expressed support for the implementation objectives of the meeting. Including the initial direct involvement of stakeholders, then a focused meeting was held in Bandar Lampung, which was the beginning of uniting interests for stakeholders with the main objective of relating to National Parks and coffee farmers. The provincial government, the Director-General of the Ministry of Environment and National Park Management with partner NGOs expressed support for the implementation objectives of the meeting. Including the initial direct involvement of stakeholders, then a focused meeting was held in Bandar Lampung, which was the beginning of uniting interests for stakeholders with the main objective of relating to National Parks and coffee farmers

#### **METHODS**

##### **Reviewers' Comments**

It is recommended that the authors present the strategy implementation environment matrix in the form of diagrams and analyze its utility.

What kind of cooperation does "pro-policy" in Figure 1 refer to?

##### **Author's Response**

The author team has changed the table into a diagram and has explained the detailed points of the policy pros right below the diagram along with other points

#### **RESULT AND DISCUSSIONS**

##### **Reviewers' Comments**

It is suggested that the authors analyze the evaluation indicators of the permanent effectiveness of state protection.

Does the introduction of several large mammals have any impact on assessing environmental protection effects?

Are there environmental and climatic differences between the two parts of the BBSNP area that will affect its management practices?

**Author's Response**

**The author team has improved the results of the discussion by analyzing indicators for evaluating the permanent effectiveness of state protection, the impact of introducing large mammals, differences in area management in 2 different climate types.**

**The highlight points are as follows:**

Various efforts have been made by the TNBBS Center in managing and maintaining the integrity of the national park area. The form of efforts made is adjusted to the direction and objectives of BBSNP management. Management of conservation areas in practice faces many challenges, namely external in the form of seizure of space and economic assets, encroachment, illegal logging, animal hunting, forest fires and internally in area management in the form of planning systems, stakeholder boundaries, leadership and management. Seeing from the many challenges experienced in managing this conservation area, the central/state party in providing permanent protection can be said to be effective because the protection provided by the state can directly solve the challenges in the internal management of the area, where all stakeholders will work together.

In this case, the management of the diversity of flora and fauna found in the Bukit Barisan Selatan National Park has different programs, so the two priorities cause no significant impact on managing the wealth of flora and fauna and the landscape of the area in the Bukit Barisan Selatan National Park.

The damage is characterized by changes in vegetation cover to vegetation cover that is not the same as it should be. Since the BBSNP area is a representative protected area for lowland and mountainous rain forests, naturally BBSNP area has initially been a forest. The damage is characterized by changes in vegetation cover to vegetation cover that is not the same as it should be. Since the BBSNP area is a representative protected area for lowland and mountainous rain forests, naturally BBSNP area has initially been a forest. The damage is characterized by changes in vegetation cover to vegetation cover that is not the same as it should be. Since the BBSNP area is a representative protected area for lowland and mountainous rain forests, naturally BBSNP area has initially been a forest.

**CONCLUSION**

**Author's Response**

**The author team has improved a better conclusion with an overview of future research that can be sustainable**

This village conservation model can save tropical rainforests in TNBBS.

The condition that the success of this village conservation model goes through several stages, namely first, the importance of paying attention to the type of community and the cultural values of the local community, because the success of the conservation village around the forest is primarily determined by the community's acceptance of the program and there will be increased participation in program implementation so that in its implementation program can run effectively and efficiently. Second, government support through policymaking can help strengthen the implementation of conservation policies to save tropical rain forests in TNBBS. And third, the effectiveness of the conservation village model in efforts to save tropical rain forests can be accelerated by the existence of training programs, group strengthening, understanding of community empowerment, facilitator capacity, mentoring processes, networks, and partnerships, the proportion of empowerment activities according to local conditions and needs, as well as monitoring and evaluations are carried out on an ongoing basis. Thus, the implementation of the Conservation Pekon in Tropical Rain Forests in TNBBS has had a positive impact on the vegetation, which has begun to vary again, which previously had experienced a decline in the diversity of vegetation and flora and fauna. In addition, the implementation of

Pekon Conservation can also reduce community dependence on forests, thereby reducing the threat of exploitation of human resources and reducing degraded land in watersheds [DAS].

#### **OTHERS**

##### **Reviewers' Comments**

Misspelled word, it should be "theoretical" instead of "theoretical".

There are two periods at the end of the fourth paragraph of subsection 4.1, and the author should pay attention to the writing rules.

Authors should pay attention to the writing norms and standards of the article, and the indentation of paragraphs in the article should be unified.

It is suggested that the author put the interview content and the data results of the questionnaire at the end of the article in the form of an attachment.

Figures and tables should be inserted in the corresponding positions of the text, which can improve the readability of the article.

##### **Author's Response**

The author has fixed:

Misspelled words

Pay attention to the norms and standards of article writing.

Appropriate research interviews and questionnaire results data at the end of the article in the form of attachments, and adjustments.

And fixed Figures and tables must be inserted in the position of the text.

Bandar Lampung, April 20, 2022
