Comments on major issues

1. What is the gap of this article with the similar article? Please explain the novelty.
2. What are the relevant applications of this theory and findings?
3. Judging from the list of references used, where almost all of the references are outdated publications, is this a relevant issue to solve at this time?

The following is an example of a new and current reference that can be used.

Senning, Jonathan R. "Computing and Estimating the Rate of Convergence" (PDF). gordon.edu. Retrieved 2020-08-07

Comments on the minor details of the article

1. Can it be equipped with a convergence plot?
2. You can also complete it with numerical analysis.

Decision

- Accept with minor revisions
