Reviewer's comments to the authors:

Dear authors, the manuscript needed some purely grammatical corrections. For the rest it is well organized and easy to follow. Maybe you could have spent some more words on the conclusion, since the importance of various energy resources nowadays. Also, given the relatively high temperatures that need to be reached for the conversion of oil-shale to oil, one could have dedicated a paragraph to the economical feasibility of this kind of processes (well, this in particular), but clearly it is not compulsory.
