Cc: Andri Pranolo <andri.pranolo@tif.uad.ac.id>, rusydi.umar@tif.uad.ac.id

Dear authors,

We have received a report generated from plagiarism detector software used by IEEE, that your paper has similarity over 20%. This means that less than 80% of your paper content is considered to be original. Rest of the content might be taken from other publication without proper citation.

As required by IEEE, papers that will be published in IEEE Xplore must have similarity below than 30%. But to be safe, we recommend a maximum of 20% similarity. Hence we would like to ask your cooperation to revise your final manuscript to reduce the similarity level.

Attached is the list of remarks you should put attention to. Please revise your paper accordingly.

We advise to send your revision (pdf file) to andri.pranolo@tif.uad.ac.id, andri.pranolo.id@ieee.org latest by November 24th, 2015.

We apologize that if your paper still has similarity over the recommended percentage after this revision, IEEE Xplore will not publicize your paper.

Thank you in advance.

Best regards,

Technical Program Chair

[ICSITech 2015] Your paper #1570148109 ('Performance Analysis of ArubaTM Wireless Local Area Network Lampung University')

3 messages

info@icsitech.org <info@icsitech.org>

Fri, Jun 5, 2015 at 3:21 PM

To: Gigih Forda Nama <gigih@eng.unila.ac.id>, Muhamad Komarudin <komar@eng.unila.ac.id>, Hery Dian Septama <hery@eng.unila.ac.id>

Cc: yanto.itr@is.uad.ac.id

Dear Mr. Gigih Nama:

We are sorry about your paper #1570148109 ('Performance Analysis of ArubaTM Wireless Local Area Network Lampung University') need more review by Technical Committee. Please strictly follow this comments:

1. Ensuring the paper conform to standard of IEEE Manuscript Templates for Conference Proceedings (http://www.ieee.org/conferences_events/conferences/publishing/templates.html).
2. Please follow the reviewers instructions.
3. Please revise or add more reference at least from the last five years published in the high quality journal or proceeding i.e ieee xplore, scopus etc.

it would be rejected if this remainders are omitted!

Regards,
The Technical program chairs

===== ICSITech review_form_1 1 =====

The abstract is too rambling, the technical content of the paper is not well formulated and theoretically questionable as well. in addition, the analysis technique is not written clearly. the author overlooked plenty of recent work which have been published in good quality conference and or journal. most of reference were published before 2010.

===== ICSITech review_form_2 2 =====

Abstract should consist of one paragraph and not more than 250 words. Please shrink it. The English is very poor, please rewrite it with a proper English. The Idea is good, there is no novelty, but the result is very useful for University in order to increase the quality of service.

Dear ICSITech Commite,

We have made some changes of our paper;

1. Paper already comply with IEEE Manuscript Templates for Conference Proceedings (http://www.ieee.org/conferences_events/conferences/publishing/templates.html).
2. We also completed Reviewer instruction on review_form_1, review_form_2.
3. Adding more reference, mostly from Springer publisher (2010-2015).

If there is need more correction, please inform us.
Thankyou.

Cc: andri.pranolo.id@ieee.org, rusydi.umar@tif.uad.ac.id

Dear authors:

We would like to acknowledge you that we have received your camera ready manuscript.

However, we still found some revision in your manuscript.

According to IEEE regulation, all manuscript that will be submitted on IEEE Xplore must follow IEEE manuscript template for conference proceeding

and unfortunately we already close the submission for camera ready, so here we offer a solution.

1. The authors can reply and send the .docx, .doc or your other manuscript format to the technical program through this email :

andri.pranolo.id@ieee.org or andri.pranolo@tif.uad.ac.id

2. We will revise the manuscript to follow the IEEE manuscript template for conference proceeding

3. We will convert the manuscript into pdf using pdf express

4. We will upload in Edas and notify the authors that the camera ready paper is submitted

5. The authors can crosscheck the revised camera ready manuscript

6. If there are any complaints, authors can send through this email andri.pranolo.id@ieee.org or andri.pranolo@tif.uad.ac.id

Here the list of the recommended improvement:

1. Keywords only use small letters except abbreviations and separate with semicolon

2. Citation/reference number should be written consecutively according to their appearance in the paragraph

3. Insert introductory paragraph after section title

We advise that the manuscript must be sent before October 13, 2015, before pdf express service is closed.

Thank you

Regards,

The Technical program chairs

Dear ICSITech Committee

Attach below was paper revised according to your suggestion.

Please update on EDAS application, because we can't find the final manuscript upload button. (pdf file was created using pdf-express)

Thank You
