Bukti Pemberitahuan Review 1 di OJS

The screenshot displays a review notification from the journal 'Educational Administration: Theory and Practice'. The notification is addressed to Sowiayah Sowiayah, Hasan Hariri, Ryzal Perdana, and Hedy Ramadhan Putra P. It states that a decision has been reached regarding the submission, and the decision is 'Revisions Required'. The notification includes a section for 'Reviewer 1 Comments' with the following text:

Reviewer 1 Comments
For author and editor
The authors have submitted a research article titled "Analysis of Quality Management of Inclusive Schools in Metro City Lampung, Indonesia." The manuscript was carefully reviewed. There are many issues that need to be resolved before publication. Some of my comments on this paper are shown below:

- The plagiarism of the article is 25%; it should be reduced to below 15%.
- There are a few typographic, spelling, and grammatical mistakes in the paper. Significant attention must be given to formatting, structure, and grammar. Better check with a native English speaker.
- Please format the manuscript based on the journal's author guidelines. Your structure should be as follows: introduction, literature review, methodology, results or discussion, conclusion, acknowledgement (optional), and reference. The APA 6-format should be used for references. Please refer to the reference format based on this link: <https://libguides.library.usyd.edu.au/c.php?g=508212&p=3476096>
- The table explanations are not sufficient. A detailed explanation is needed.
- The "Research Methodology" section is not clear; please provide full details.
- Questionnaire details are to be provided in this study.
- Is there any inclusion or exclusion criteria? Provide the details.
- The acknowledgement and funding statement (if available) are added in the main text.
- The reference study was then checked. Make sure that all references are cited in the main text.

Bukti Pemberitahuan Review 2 di OJS

The screenshot shows the 'Reviewer 2 Comments' section in an OJS submission interface. The left sidebar contains navigation options like 'Back to Submissions', 'Notifica', 'Review', 'Revisi', and 'Review'. The main content area displays the following text:

Reviewer 2 Comments:
For author and editor
The research has good implications for the future prospectus, however novelty of the research is questionable as 2 types of research already been done with topic in similar area.

General; Please delete the contents of the submission of the research which has been previously submit to some other journal, such as DOI of previous journal etc.

Abstract: In the abstract section, author did not mention about the methodology of the study, without methodology, you are coming directly to results. The name of criteria used for the quality of inclusive school management in terms of the context component? Conclusion section is very bad, totally confusion.

Introduction: please explain the variables that have received ample focus in the teaching field. Authors have mentioned that "There are still many findings in the field, where schools that serve inclusive education do not have a good management system that makes inclusive education only work as it is where the vision in its implementation is only to accept and send children with special needs to school" , Please explain in detail, what shall be good management system to be there? The authors did not mentioned about the education for children with disabilities in Extraordinary Schools / Disabled Schools (SLB), Extraordinary Primary Schools (SDLB), and Integrated Education. Extraordinary Schools / Disabled Schools (SLB), please brief me about these also.

Methodology: The instrument used in this research in the form of a questionnaire using google form, the questionnaire was open ended or close ended? How the processing of the data has been done? Which stat analysis has been used? Which specific tests have been used to prove the results, Authors did not mentioned any p value for stat analysis. The teachers who were enrolled in the study were from primary wing/ Secondary wing/ Higher secondary level?

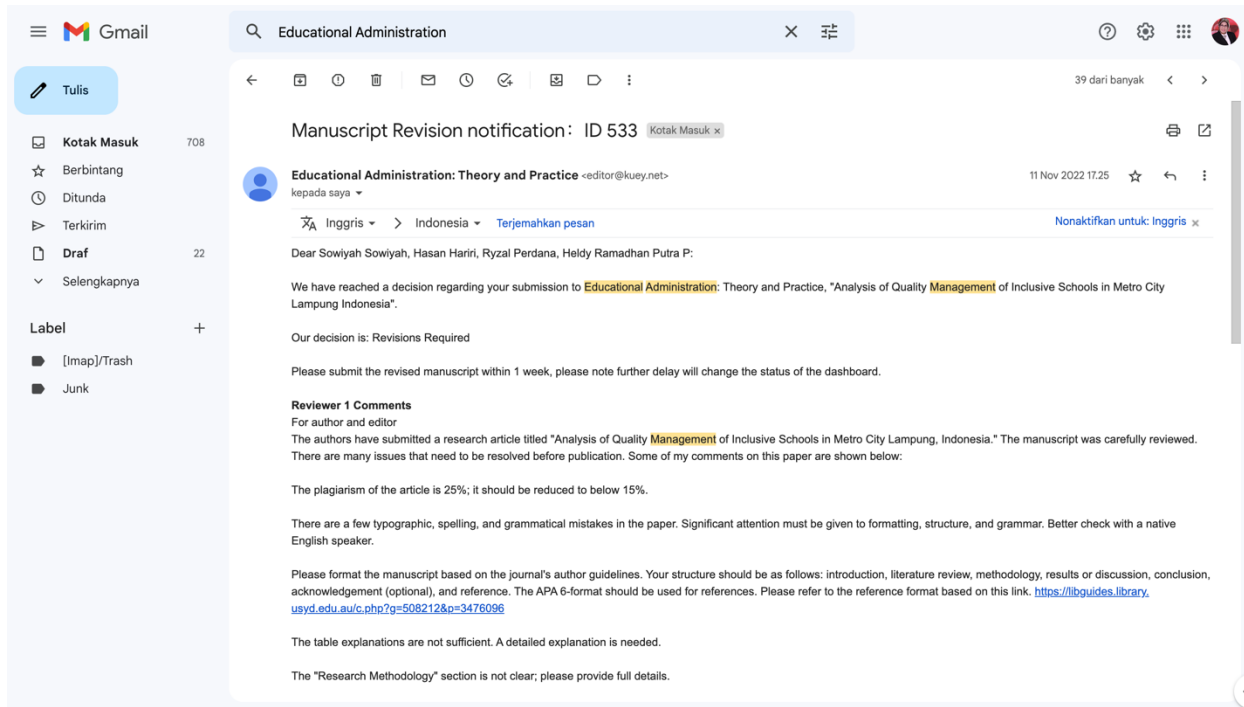

Results: The results of Context Component is confusing, please change the language.

Research Obstruction : While implementation of inclusive education what still faces obstacles? What is your opinion in that

Limitation: The authors needs to mention about the limitation of the study

Conclusion: The conclusion section is very bad, please rewrite the section

Bukti Pemberitahuan Review di email

The screenshot shows a Gmail interface with an open email titled 'Manuscript Revision notification: ID 533'. The email is from 'Educational Administration: Theory and Practice' and is dated '11 Nov 2022 17:25'. The email content is as follows:
