Dear Professor Erlina Rufaidah,

I am forwarding you the decision of the Associate Editor with regards to your manuscript;

=====
Unfortunately, the paper 5115-874 cannot be published in the present form.

We cannot publish it because it has several grammatical errors.

In order to improve your paper, you may copy-paste the text inside a GMAIL.

Another, very important reason is that the authors must improve their references

*Instead of
 enormous marine and fishery potential [1].
 they have to write
 enormous marine and fishery potential, [1].*

*Instead of
 billion in 2020 [2].
 they have to write
 billion in 2020, [2].*

*Instead of
 of raw fish [5],[6].
 they have to write
 of raw fish, [5],[6].*

These are only some examples as their paper is full of such errors.

In general a reference [n] should be inside the text as , [n], or as , [n].

That means that the [n] should be separated by punctuation marks

Also, to separate references use "," not " ;"

In addition, the authors need to look over and verify whether the in-text citations exist in the reference list and whether all the articles mentioned in the reference list exist in the in-text citations.

Check also if the in-text citations of the Tables, Equations and Figures are properly connected with the Tables, Equations and Figures.

Note that due to the Greek National Holiday of October 28, 2022, our Editing Department will be closed on October 27 and October 28.

=====
 Kindly arrange the above corrections and as soon as you are ready, please email me your re-Revised version.

Best Regards,

Melandri Elvira

Reviewer(s)' Comments to Author:

Reviewer: 1

Comments:

The work is good. It provides all the theoretical, methodological and empirical attributes of the treated problem and its solutions.

1) According to the WSEAS format (template: <https://www.wseas.com/format.php>), all the references should be cited in the text as [1], [2], etc (not as (Author, Year)). The font size of the numbers should be the same with the text.

2) More attention needs to be drawn to the numbering of the sections.

3) The presentation of the section 2.2 'Data Collection' needs improvements and more details.

4) The authors must provide more ideas about future research in this area.

5) The authors should explain the contribution of their study in comparison with the corresponding studies of other researchers.

Additional Questions:

=====

Does the paper contribute to the body of knowledge?: Yes.

Is the paper technically sound?: Yes

Is the subject matter presented in a comprehensive manner?: Yes.

Are the references provided applicable and sufficient?: Yes

Recommendation: Accepted after minor revision

Reviewer: 2

Remarks:

- 1) The presentation of the literature could be improved. The authors analyze a lot of papers. A comparison between them would be useful.
- 2) The section D-'Sensitivity Level Analysis' in the present form is relatively weak and should be strengthened with more details.
- 3) Why is this paper important to the financial feasibility? Please, explain.
- 4) In conclusions section the authors summarize the main points of their study. The authors should explain the contribution of their study in comparison to studies of other researchers. In addition, in conclusions section the authors should refer the advantages of their study. They should emphasize and analyze them in detail.

Additional Questions:

=====

Does the paper contribute to the body of knowledge?: Yes

Is the paper technically sound?: Yes.

Is the subject matter presented in a comprehensive manner?: It should be improved.

Are the references provided applicable and sufficient?: Yes

Recommendation: Major revision

Reviewer: 3

Comments:

The aim of the paper should be clearly define in the introduction.

In the abstract and conclusion section summarize the article's main findings and indicate the main conclusions or interpretations.

Explain how this paper differs from the related ones published in the technical literature.

It is mentioned in conclusions section that 'By expanding the market, the owner's business can last longer if there is a decrease in the selling price or an increase in the price of anchovy raw materials.' More justification should be furnished on this issue.

Additional Questions:

=====

Does the paper contribute to the body of knowledge?: It is not clear.

Is the paper technically sound?: Yes

Is the subject matter presented in a comprehensive manner?: Revision is required.

Are the references provided applicable and sufficient?: Yes.

Recommendation: Accepted after major revision
