Please note that this email may not include all details of your article's evaluation. The full decision is available here:  
<https://www.editorialsystem.com/hivar/article/241911/view/#showDecisionLetter232430>

Review 1:

The article is adding knowledge to the AIDS studies, but there are some suggestions to improve the work.

- 1- Please add more literature on media and aids.
- 2- What are the research questions? And objectives?
- 3- what kind of method has been used?
- 4- add practical implications.

Good luck

Review 2:

I have read this paper with great interest. Article is good enough no further revisions are required.

Dear Dr. Wardhani, I'm writing to you on behalf of the 'HIV & AIDS Review' and Termedia Publishing House with regards to your paper accepted for publication by our journal.

Your article is being prepared for the publication (enclosed you will find a corrected file), but we have found a huge problem with the references. According to Instructions for the Authors: 'Reference items should be put in a list according to the order in which they are cited in the text. Each item should contain the following: a) surnames and first letters of names (without a dot) of all authors when there are six or fewer; when there are seven or more, list the first three, then „et al.“; b) full title of the paper in original (capital letters should not be used at the beginning of each word, only the first word should begin with a capital letter); c) abbreviated name of the journal in which the paper was printed in the form specified by Index Medicus; and d) year of publication, volume, full numbers of the first and last pages of the cited passage. If the cited work is available only online, the DOI numer should be given, and in the case of lack thereof - URL with access date.'

Please correct the article accordingly and send the updated Word file back to me. We want to publish your paper in issue 1/2023.

Thank you!

Yours sincerely,

Marzena Demska
