Dear Dr. Kusuma Adhianto,

We have received the reports from our reviewers on your manuscript, "Genetic and Phenotype Correlation of Weaning and Yearling Weight of Female Saburai Goats In Sumberejo District, Tanggamus Regency, Lampung Province, Indonesia", which you submitted to Advances in Animal and Veterinary Sciences with **MH20211031101047**.

Based on the received comments, your manuscript could be reconsidered for publication, should you be prepared to incorporate Minor Revisions.

The comments and requests of the Editor and the Peer Reviewers are included below. Please share this information with all coauthors of the manuscript.

Editor's Comments:

- Review the peer review comments and requests carefully, and edit the manuscript accordingly.
- Include a separate point-by-point response file addressing the reviewers comments along with an explanation of any request of the editor or the reviewers that you do not address in your revised manuscript. Your list of responses should be uploaded as a Cover Letter in addition to your revised manuscript.
- Please colour (e.g. red in contrast to black text) all changes in the revised manuscript, without such coloured changes the manuscript may be returned or rejected.
- Verify the placement and accuracy of each reference in your manuscript as well as the accuracy of all of the values in your tables and figures.
- Please ensure that all author's names and their affiliations are placed correctly.
- Make every effort to address the remaining concerns and to resubmit your manuscript. If you anticipate an additional delay, or if you do not wish to resubmit your manuscript, then please notify us as soon as possible.

Reviewer(s) Comments to Author

Comments to the Author

ABSTRACT: It's good, but with revisions to the conclusions, according to the conclusions on the contents of the manuscript.

INTRODUCTION: This section has enough information about the subject of the study. Need revision on goals, not estimating but to find out.

METHODOLOGY: It accurate and well articulated.

RESULTS: These results novel, contribute to the advancement of understanding and are pragmatic.

DISCUSSION: It well written and sufficiently discuss the results. Need to add: Why genetic correlation moderately positive, why phenotypic correlation medium category, why environmental high category? Caused by ... (feed, housing, maintenance, disease and climate?).

CONCLUSION: It's ok, with a little revision.

REFERENCES: Old references are more than 40%. Need to be replaced.
